Cardio IQ Lab

Cardio IQ Lab offers innovative, scientifically proven, and medically relevant biomarkers that are predictive of cardiovascular risk. They offer inflammatory and other advanced biomarkers that help in the management and prevention of heart disease. Based on their advanced cardiovascular testing, they provide some actionable information to individualize treatment options. To learn about their testing options **click here**.

If you scroll down the page, you will be able to look at many of the biomarkers they test for and their relevance to cardiovascular disease. Cardio IQ is a subsidiary of Quest Diagnostics and is in network with the same insurances that Quest is in network with. To check if your insurance is in network, **click here**.

For those plans that are in network with Quest, there is no upfront cost but your out-of-pocket expense depends on your insurance plan. You may want to check your benefits first and if helpful call the billing department at Cardio IQ Lab if you want to know the approximate amount for which you will be responsible.

If you have general billing questions, please contact Billing at 866-697-8378 option 3 or email by **clicking here**.

For more information, please feel free to reach out to our local representative, Melissa Rosman, who can be reached at 201-993-3912 or by email at melissa.a.roseman@questdiagnostics.com.
