Cleveland Heart Lab (CHL)

Cleveland Heart Lab (CHL) offers innovative, scientifically proven, and medically relevant biomarkers that are predictive of cardiovascular risk. They offer inflammatory and other advanced biomarkers that help in the management and prevention of heart disease.

CHL has a robust research and development program that concentrates their efforts on developing inflammatory markers for cardiovascular disease.
To learn more about CHL, **click here**.

They offer information about assessing your risk for heart disease and testing for further determining your risk. You will see this information once you **click here**. If you scroll down the page, you will be able to look at many of the biomarkers they test for and their relevance to cardiovascular disease.

CHL is a subsidiary of Quest Diagnostics and is in network with the same insurances that Quest is in network with. To check if your insurance is in network, **click here**.

For those plans that are in network with Quest, there is no upfront cost, but your out-of-pocket expense depends on your insurance plan. You may want to check your benefits first and, if helpful, call the billing department at Cleveland Heart Lab if you want to know the approximate amount for which you will be responsible.

If you have general billing questions, please contact Billing at 866.358.9828 option 2 or EMAIL chlbilling@clevelandheartlab.com.

Lastly, for Traditional Medicare, if it is medically necessary, the specific test panel is totally covered and is of no cost to the patient.

For other billing questions, call our local representative Melissa Rosman at 201-993-3912 or by email at melissa.a.roseman@questdiagnostics.com.
